

# Local Fixers Mapping Project (LFMP)

Community Creativity for Development (CC4D) is a Youth-led community-based organization formed in August 2019 by group of South Sudanese Refugee Youth professionals who saw a gap in repair, reuse and maintenance of Electronics.

---

CC4D aim "To digitally connect Communities while protecting the environment from carbon emission and landfills using the available resources for self-reliance and sustainable development." and already has a presence on the ground, implementing digital literacy skills training programs, mobile ICT mentorship for women and girls and repair café events (mobile repairs and maintenance of electronics)

---

CC4D is conducting a mapping exercise of all repair technicians within rhino camp refugee settlement aimed at creating a database of local fixers in the repair of different items. this database will help us in engagement of the local fixers when ever possible especially during our local repair cafe events. The database will be managed by CC4D and shared by relevant stakeholders upon request. Participation is Voluntary and any data collected shall be treated in a confidential manner. CC4D reserve the right for privacy. Thank you!
