

List of services which can be provided by the application

Anforderung des Projekts ist die Entwicklung einer Applikation zur Planung von Workshops / Trainings vorerst in den verschiedenen Refugee Settlements Südsudans und Uganda. Mit der Applikation sollen Informationen zu Trainings angelegt, gespeichert und abgerufen (von Teilnehmern sowie auch Trainern) werden können.

Folgende mögliche Anforderungen könnten von der Applikation bedient werden:

TRAININGS

- Create trainings save them and share them with other hubs / institutions / etc.
- Create / collect different topics (for further trainings)
- Prepare / save training related elements
 - Repair: Checklist for Devices (what to check first), table with all the different devices and possibility to mark if its fixed or not
 - Skills Training: Certificate, keep track of participants
- Different categorize of trainings (skills, empowerment, repair, awareness)

DOCUMENTATION / PROPOSAL

- Possibility to generate a report for documentation purpose
 - Costs (material, food / drinks, rent, traveling costs, salary for assistance, etc.)
 - Number of participants
 - Topics and content
 - Duration / length
- Possibility to generate a proposal for additional fundings (see topic report above)
- (Possibility to generate a proposal to get the permission to do trainings in settlements and communities - permission is granted by community leaders and RWCs)

PARTICIPANTS

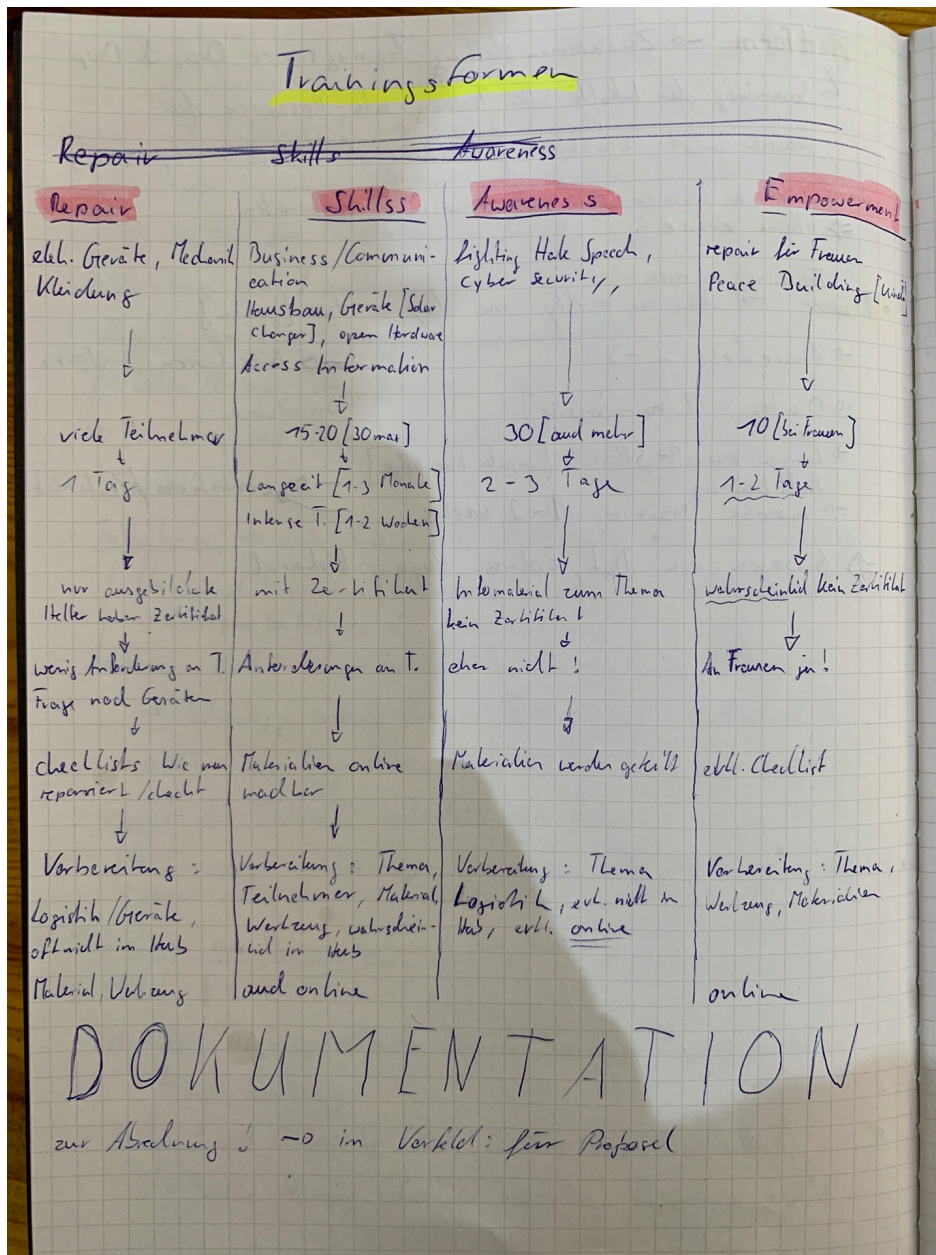

- Participant acquisition / participant categorization
 - Education (e.g. basic mathematics, read and write)
 - Language
 - Motivation
 - Possibility to apply for a training as a participant
- Create certificates
- Share information, data, learning content (trainer to participant, trainer to trainer)

ARCHITECTURE

- Offline mode
- Mobile first

- GitHub / GitLab as backend / infrastructure

Overview different types of training with typical requirements:

The repair training is outstanding compare to the rest, in terms of number and education of participants and preparation of trainers.
