## ⇒ Google Material Design : Bottom Navigation

only for Top-level - Destination need to be accessible from anywhere

≥ 5 Punkte, only Apps [mobile / Tablet]

Browse → FAB [programm auf Screen] / Bottom Navigation [gegen Richtlinie]  
↳ kann Position + Verhalten ändern [Add / Back]

## Bottom App Bars : Apply to Actions of current Screen !

↳ Navigation Menue + FAB + overflow Menu Control + max. one action  

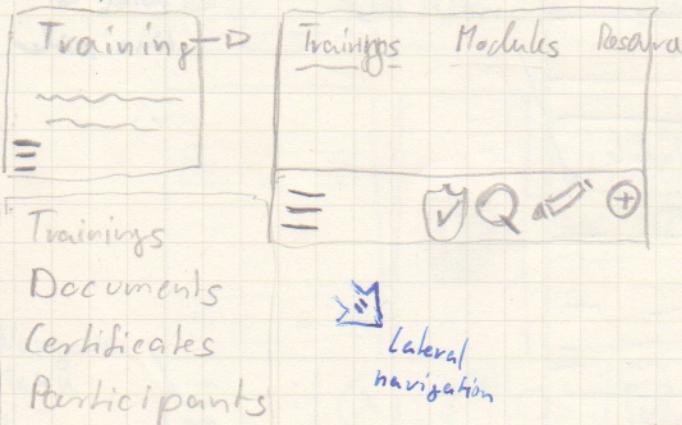

↳ ohne FAB: max. 4 Actions on right side

↳ führt von unten hoch

→ kann und darf keine Elemente enthalten → Screen spezifisch ist dann in top app bar

- new Training /Module kann in Übersicht aus dem "Menü" verschwinden → Big Buttons
- Browse eigentlich immer dabei, kann bei Z.D.T. auch als Back Button fungieren
- Home Button evtl. als "Bad Button" mit ⏪ "last Screen title"  
→ "Bread-Crumbs - McLoche"  
↳ nicht im Menü! oben links!

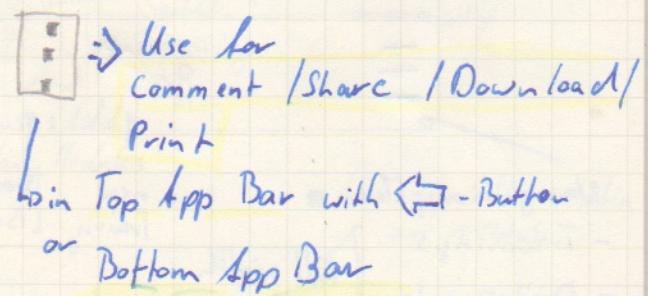

### Possibility for Tab - Navigation

- ↳ for 5 or more primary destination → full horizontal width from bottom or left upper corner
- ↳ icons möglich
- ↳ full vertical height
- ↳ Desktop = permanent

### Tabs:

- all same level of hierarchy
- fixed or scrollable
- icons possible

### Top App Bar : Actions related to current screen

- + screen titles + Branding + navigation
- kann zur Kontextual Action Bar werden [z.B. Farben k.]

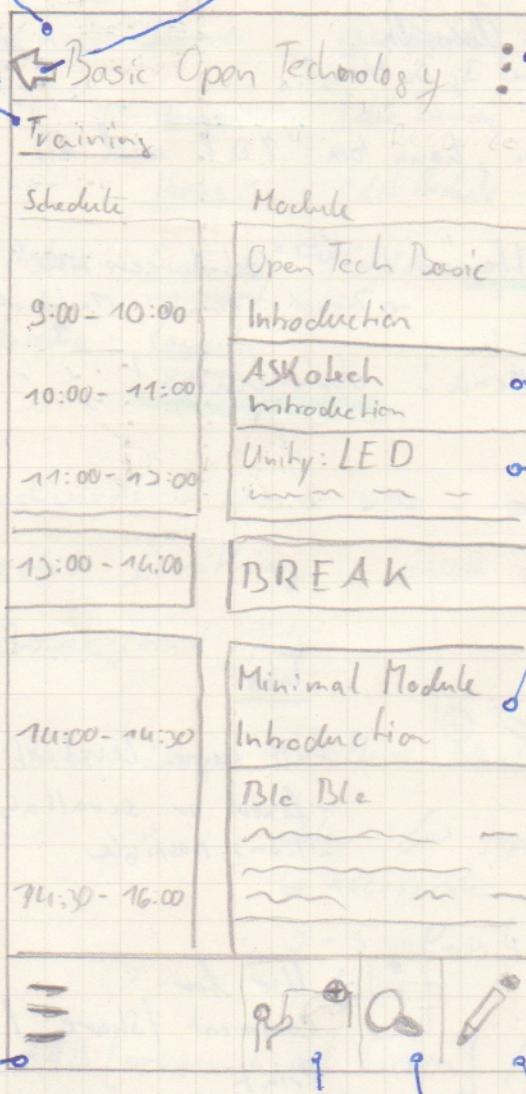

# Display Training

## Title of Training

## Back-Button
